

Training and Education

Understanding the importance of cyber security

Having staff aware and engaged with cyber security helps to better protect your business. Human error is one of the greatest threats to you will face so education is key.

Ensuring employees are aware of some of the techniques used by cyber criminals will keep them alert and diligent, forming another line of defence for your business.

Our training courses are informative but informal and engaging, teaching best practice in data storage, application downloads, passwords, spam, email, back-ups and even physical security.

We use a mixture of discussion and activities to bring home the main points and create a cyber aware culture to make your organisation stronger.

We address the most common ways an employee can be targeted by cyber criminals including:

- RANSOMWARE
- MALWARE
- CEO FRAUD
- COMPLIANCE FAILURE
- PHISHING
- SPEAR PHISHING
- EXECUTIVE WHALING
- SOCIAL ENGINEERING

Each of our courses is designed and tailored to your specific organisation and is delivered by one of our experienced cyber security experts at your premise.
